The Australian flora and fauna element has a strange taste sensation. It's a bit fruity, but I really like the meat and sauce. It could have been better if there were cheese and pickles on it.

It's good. I think the blend of emu and kangaroo works quite well, and it's lean, making it a healthy burger. It could have done with a little more meat, but that's just me being a bloke.

I wouldn't usually order it, so I am really surprised I like it. It's quite light and fresh, and easy to eat, but I think my heart is still with chicken.

I don't normally eat burgers, but it's really delicious and different. The meat has a nice texture. It's not as chewy, it's soft and tender.

It's fantastic. It has a very unique flavour. I haven't tasted anything similar before. I think the ingredients will throw a lot of people off, but my palate definitely appreciates it.
